APPRECIATION LETTER

We at the Central Coffee Research Institute (CCRI) would like to express our sincere gratitude for the demonstration of your innovative drone and multi-purpose robot. The capabilities showcased were truly impressive, and our scientists were thoroughly enlightened by the potential applications of these technologies in our research endeavor.

We are excited about the prospect of collaborating with your organization to explore the integration of these technologies into our research projects under mechanization in coffee plantations. The demonstration has solidified our belief that your products can significantly enhance labour efficiency and productivity of coffee, if it will be modified as per suggestions of our Scientists.

Thank you once again for your time and expertise. We are looking forward to the possibility of working together with Central Coffee Research Institute.

Thank you again for your time and expertise.

Yours Sincerely

संयुक्त निदेशक (अनुसंधान)
